

REPRIME GROUP

Terminal Data Intelligence Engine

Complete Data Source Reference Guide

Free · Freemium · Paid — Every Source, Every Endpoint, Every Price

Confidential — June 2026

Executive Summary

Terminal ingests data from **63 core intelligence sources** across three access tiers. **Tier 1 (29 sources)** requires zero authentication — these are US government systems (Federal Reserve, Treasury, FEMA, EPA, SEC, BLS, Census) that have been publicly operational for 10–30 years. **Tier 2 (14 sources)** requires a free API key — one-time registration, 30–120 seconds each, no credit card, permanent keys. **Tier 3 (20 sources)** are institutional-grade paid vendors activated as deal flow justifies the spend.

Key Architecture Decision:

Even at full Tier 3 deployment (~\$300K/year in data costs), Terminal processes 100+ deals/day. At 50 deals/day across 250 working days = 12,500 deals/year. Data cost per deal = **\$24**. A single successful CRE acquisition generates returns that pay for a decade of data costs.

Tier Breakdown

Tier	Sources	Annual Cost	Registration	Key Stat
No Auth	29	\$0	None needed	10–30 years operational
Free Key	14	\$0	15 min total	Permanent, no CC
Paid	20	\$2K–\$300K	Vendor contract	Activated on demand
TOTAL	63	\$0–\$300K	—	—

TIER 1: ZERO AUTHENTICATION REQUIRED

These endpoints require nothing. No API key, no registration, no account. Call them right now.

1. NY Fed SOFR

Provider: Federal Reserve Bank of New York

Endpoint: <https://markets.newyorkfed.org/api/rates/secured/sofr/last/1.json>

Data Returned: Secured Overnight Financing Rate, percentile 1/25/75/99, volume in billions

Update Frequency: Daily ~8:00 AM ET, T+1 business day

CORS: Yes (Access-Control-Allow-Origin: *)

Format: JSON

CRE Use: Benchmark floating-rate index; directly prices CRE bridge loans, construction financing, CMBS coupon resets. Live test 2026-06-01: returned 3.63%.

2. NY Fed EFFR

Provider: Federal Reserve Bank of New York

Endpoint: <https://markets.newyorkfed.org/api/rates/unsecured/effr/last/1.json>

Data Returned: Federal Funds Effective Rate, target range (from/to), percentiles, volume

Update Frequency: Daily ~8:00 AM ET

CORS: Yes

Format: JSON

CRE Use: Fed policy rate; governs short-term borrowing cost for all CRE debt. Live test: returned 3.62%, target 3.50–3.75%.

3. NY Fed All Rates

Provider: Federal Reserve Bank of New York

Endpoint: <https://markets.newyorkfed.org/api/rates/all/latest.json>

Data Returned: SOFR 30-day (3.61%), 90-day (3.65%), 180-day (3.72%) averages plus index, EFFR, OBFR, TGCR, BGCR — all in one call

Update Frequency: Daily

CORS: Yes

Format: JSON

CRE Use: 30-day SOFR average is the index most commonly used in floating-rate CRE debt; one call replaces 8 separate lookups.

4. FRED CSV Endpoints

Provider: Federal Reserve Bank of St. Louis

Endpoint Pattern: https://fred.stlouisfed.org/graph/fredgraph.csv?id={SERIES_ID}

Key Series: DGS10 (10Y Treasury, cap rate anchor), MORTGAGE30US (30Y mortgage), SOFR (daily), DRCRELEXFACBS (CRE delinquency), H8B3219NCBCMG (CRE loan balances weekly), DGS2 (2Y yield for spread calc), DFII10 (10Y TIPS real rate)

Update Frequency: Varies — daily to quarterly depending on series

CORS: No (server-side proxy required)

Format: CSV

CRE Use: The single most important free data source for CRE — 800,000+ economic time series covering every rate, spread, and macro indicator.

5. US Treasury Yield Curve

Provider: US Department of the Treasury

Endpoint: <https://home.treasury.gov/sites/default/files/interest-rates/yield.xml>

Data Returned: Par yield curve all maturities (1M, 2M, 3M, 4M, 6M, 1Y, 2Y, 3Y, 5Y, 7Y, 10Y, 20Y, 30Y) in single call

Update Frequency: Daily ~6 PM ET

CORS: No

Format: XML

CRE Use: Full yield curve widget; 2Y–10Y spread is strongest leading recession signal for CRE demand.

6. FEMA Disaster Declarations

Provider: FEMA

Endpoint: <https://www.fema.gov/api/open/v2/DisasterDeclarationsSummaries>

Data Returned: Disaster type, declaration date, state, county, designated areas, program types

Update Frequency: Real-time

CORS: Yes

Format: JSON

CRE Use: Property-level disaster history screening; insurance risk assessment.

7. FEMA NFHL Flood Zones

Provider: FEMA

Endpoint: <https://hazards.fema.gov/arcgis/rest/services/public/NFHL/MapServer>

Data Returned: Flood zone designation (A, AE, X, VE), Base Flood Elevation, Special Flood Hazard Area, FIRM effective date

Update Frequency: As revised with map amendments

CORS: Yes

Format: ArcGIS REST / WFS / WMS

CRE Use: Most critical free layer for coastal MSA risk scoring; required for federal flood insurance eligibility determination.

8. USGS Earthquake

Provider: US Geological Survey

Endpoint: https://earthquake.usgs.gov/earthquakes/feed/v1.0/summary/significant_week.geojson

Data Returned: Magnitude, location (lat/lon), depth, time, felt reports

Update Frequency: Real-time

CORS: Yes

Format: GeoJSON

CRE Use: Seismic risk assessment for West Coast, New Madrid zone, and Oklahoma (induced seismicity).

9. EPA Envirofacts

Provider: US Environmental Protection Agency

Endpoint: <https://data.epa.gov/efservice/>

Data Returned: Superfund (NPL) sites, Toxic Release Inventory, brownfields, air quality, water discharges

Update Frequency: Varies by dataset

CORS: Yes

Format: JSON / CSV

CRE Use: Address-level environmental contamination screening; Phase I ESA triggering.

10. NOAA Sea Level Rise

Provider: NOAA Office for Coastal Management

Endpoint: https://coast.noaa.gov/arcgis/rest/services/dc_slr/slr_{N}ft/MapServer (N=0–10)

Data Returned: Inundation extent at 0–10 ft sea level rise scenarios, depth rasters, vulnerability index

Update Frequency: Periodically updated with new models

CORS: Yes

Format: ArcGIS REST

CRE Use: Essential for Miami, Houston, NYC, Charleston, Tampa properties — long-term climate risk overlay.

11. NWS Weather Alerts

Provider: National Weather Service

Endpoint: <https://api.weather.gov/alerts>

Data Returned: Active weather warnings, watches, advisories by geographic area

Update Frequency: Real-time

CORS: Yes

Format: JSON

CRE Use: Current-conditions context for property assessment.

12. Federal Register API

Provider: Federal Register (GPO)

Endpoint: [https://www.federalregister.gov/api/v1/documents.json?conditions\[term\]=real+estate](https://www.federalregister.gov/api/v1/documents.json?conditions[term]=real+estate)

Data Returned: Federal rules, proposed rules, notices filterable by agency (HUD, FDIC, OCC, SEC, CFPB, FinCEN)

Update Frequency: Daily

CORS: Yes

Format: JSON

CRE Use: Real-time regulatory intelligence affecting CRE lending, compliance, reporting.

13. SEC EDGAR Full-Text Search

Provider: US Securities and Exchange Commission

Endpoint: <https://efits.sec.gov/LATEST/search-index>

Data Returned: Full-text search across all SEC filings (8-K, 10-K, 10-Q, etc.)

Update Frequency: Real-time

CORS: Yes

Format: JSON

CRE Use: REIT event monitoring — acquisitions, dispositions, debt issuances, material events. Live test returned 1,756 CRE-related 8-K filings.

14. BLS LAUS v1

Provider: Bureau of Labor Statistics

Endpoint: <https://api.bls.gov/publicAPI/v1/timeseries/data/{seriesID}>

Data Returned: Unemployment rate, labor force, employed/unemployed counts by county/MSA

Update Frequency: Monthly

CORS: Yes

Format: JSON

CRE Use: Labor market health for submarket selection; tenant financial stress indicator. v1 = no key needed, limited to 25 series/day and 10 years.

15. GDELT News

Provider: GDELT Project

Endpoint: <https://api.gdeltproject.org/api/v2/doc/doc?query=CMBS+commercial+real+estate&mode=artlist&format=json×pan=24h&maxrecords=250>

Data Returned: Global news articles matching CRE keywords, tone/sentiment analysis, source countries

Update Frequency: Near real-time (15-minute updates)

CORS: No

Format: JSON / CSV

CRE Use: News ticker feed; sentiment analysis on CRE sectors; coverage volume tracking.

16. Frankfurter FX

Provider: European Central Bank via Frankfurter.dev

Endpoint: <https://api.frankfurter.dev/v1/latest?base=USD&symbols=ILS,EUR,GBP>

Data Returned: Exchange rates vs 30+ currencies sourced from ECB reference rates

Update Frequency: Daily EOD (~16:00 CET)

CORS: No

Format: JSON

CRE Use: USD/ILS ticker for Israeli investor base. Live test: USD/ILS = 2.8155.

17. Bank of Israel FX

Provider: Bank of Israel

Endpoint: <https://www.boi.org.il/PublicApi/GetExchangeRates?asXml=true>

Data Returned: Official representative USD/ILS rate

Update Frequency: Daily at ~3:30 PM Israel time

CORS: No

Format: XML

CRE Use: Authoritative USD/ILS for Israeli investor return calculations. Government open data — unlimited, no auth.

18. CoinGecko Basic

Provider: CoinGecko

Endpoint: https://api.coingecko.com/api/v3/simple/price?ids=bitcoin&vs_currencies=usd

Data Returned: Crypto prices (BTC, ETH, stablecoins)

Update Frequency: Real-time

CORS: Yes

Format: JSON

CRE Use: BTC/USD ticker. Live test: \$71,329.

19. Census TIGER Boundaries

Provider: US Census Bureau

Endpoint: <https://tigerweb.geo.census.gov/arcgis/rest/services/TIGERweb/>

Data: Census tract, block group, county, MSA, ZIP boundaries as vector geometries

CRE Use: Geospatial base layer for all demographic and economic overlays; property-to-tract mapping.

20. HUD Opportunity Zones / QCT

Provider: US Dept. of Housing and Urban Development

Endpoint: <https://hudgis-hud.opendata.arcgis.com/>

Data: Opportunity Zones (IRC §1400Z), Qualified Census Tracts, Difficult Development Areas

CRE Use: Tax incentive screening for investors; identifies OZ-eligible parcels.

21. OSM Overpass API

Provider: OpenStreetMap Foundation

Endpoint: <https://overpass-api.de/api/interpreter>

Data: POI locations (grocery, transit, schools, hospitals), road network, land use

CRE Use: Walk-score proxy; amenity density analysis; competitive landscape mapping.

22. MRLC NLCD Land Cover

Provider: Multi-Resolution Land Characteristics Consortium

Endpoint: <https://www.mrlc.gov/data-services-page>

Data: 30-meter land cover classification (developed, forest, agriculture, wetland, etc.)

CRE Use: Development potential assessment; impervious surface analysis for stormwater.

23. Microsoft Building Footprints

Provider: Microsoft / GitHub

Endpoint: <https://github.com/microsoft/USBuildingFootprints>

Data: ML-derived building footprints for every structure in the US (130M+ buildings)

CRE Use: Building inventory, density analysis, development pattern tracking.

24. Zillow Research CSV

Provider: Zillow Research

Endpoint: <https://www.zillow.com/research/data/>

Data: ZHVI (Home Value Index), ZORI (Rent Index), inventory, days-on-market by ZIP/MSA

CRE Use: Residential market context for multifamily underwriting; rent growth trends.

25. NOAA Storm Events

Provider: NOAA / NCEI

Endpoint: <https://www.ncdc.noaa.gov/stormevents/ftp.jsp>

Data: Historical severe weather events with damage estimates, locations, narratives

CRE Use: Property insurance risk modeling; historical storm damage by county.

26. NOAA Climate Normals

Provider: NOAA / NCEI

Endpoint: <https://www.ncdc.noaa.gov/products/land-based-station/us-climate-normals>

Data: 30-year climate normals (temperature, precipitation, degree days) by station

CRE Use: Energy cost modeling; climate risk baseline for property operations.

27. USDA Cropland Data Layer

Provider: USDA NASS

Endpoint: <https://nassgeodata.gmu.edu/CropScape/>

Data: 30-meter crop-type classification covering all US agricultural land

CRE Use: Agricultural land valuation; development conversion potential for fringe parcels.

28. FBI UCR Crime Data

Provider: FBI Criminal Justice Information Services

Endpoint: <https://api.usa.gov/crime/fbi/cde/>

Data: Uniform Crime Reporting data by agency, state, and national level

CRE Use: Property-level crime risk scoring; tenant/resident safety assessment.

29. US Treasury Auction Results

Provider: US Treasury / TreasuryDirect

Endpoint: https://api.fiscaldata.treasury.gov/services/api/fiscal_service/

Data: Auction results, debt outstanding, average interest rates on federal debt

CRE Use: Treasury market supply dynamics; real-time auction demand signals.

TIER 2: FREE API KEY REQUIRED

One-time registration. 30–120 seconds. Permanent keys. No credit card.

1. FRED API (Federal Reserve Economic Data)

Registration: https://fred.stlouisfed.org/docs/api/api_key.html

Rate Limit: 120 requests/minute

Data Scope: 800,000+ time series — the most comprehensive free economic database in the world

CORS: No (server-side proxy required)

Format: JSON / XML

Top 15 CRE-Critical Series: DGS10 (10Y Treasury), DGS2 (2Y Treasury), DGS30 (30Y Treasury), MORTGAGE30US (30Y mortgage rate), SOFR (Secured Overnight Financing Rate), DRCRELEXFACBS (CRE loan delinquency rate), H8B3219NCBCMG (weekly CRE loan balances), HOUST (housing starts), PERMIT (building permits), CPIAUCSL (CPI — inflation), UNRATE (unemployment rate), GDPNOW (Atlanta Fed GDP nowcast), UMCSENT (consumer sentiment), COMREPUSQ159N (commercial RE price index), BOGZ1FL075035503Q (Z.1 Flow of Funds CRE)

2. Census Bureau API

Registration: https://api.census.gov/data/key_signup.html

Rate Limit: 500 requests/day (soft limit; generally higher in practice)

Data Scope: ACS 5-year, ACS 1-year, Decennial Census, Economic Census, Population Estimates

Key CRE Series: Median household income, population growth, housing tenure, vacancy rates, commute times, poverty rates by tract

CORS: Yes

3. BLS API v2

Registration: <https://data.bls.gov/registrationEngine/>

Rate Limit: 500 requests/day, 50 series per query, 20 years of data

Data Scope: CPI, PPI, employment, wages, occupational data — all at metro/county level

Key CRE Series: LAUS unemployment by county, CPI-U shelter component, QCEW employment by NAICS

CORS: Yes

4. BEA (Bureau of Economic Analysis)

Registration: <https://apps.bea.gov/API/signup/>

Rate Limit: 100 requests/minute

Data Scope: GDP by metro, personal income by county, regional price parities, industry output

Key CRE Series: GDP by MSA, per capita personal income, regional price parities (RPP) for rent-adjusted comparisons

CORS: Yes

5. EIA (Energy Information Administration)

Registration: <https://www.eia.gov/opendata/register.php>

Rate Limit: Generous (undisclosed soft limit)

Data Scope: Energy prices (electricity, natural gas, petroleum), consumption, generation by state

Key CRE Series: Commercial electricity rates by state, natural gas prices, energy expenditure forecasts

CORS: Yes

6. Finnhub

Registration: <https://finnhub.io/register>

Rate Limit: 60 calls/minute (free tier)

Data Scope: Real-time stock quotes, company financials, earnings, SEC filings, economic calendar

Key CRE Series: REIT stock prices (VNQ, SPG, PLD, O), earnings surprises, insider trades

CORS: Yes

7. Polygon.io

Registration: <https://polygon.io/dashboard/signup>

Rate Limit: 5 calls/minute (free tier), delayed quotes

Data Scope: Stocks, options, forex, crypto; historical aggregates, trade-level data

Key CRE Series: REIT index tracking, sector rotation signals, VIX correlation

CORS: Yes

8. Alpha Vantage

Registration: <https://www.alphavantage.co/support/#api-key>

Rate Limit: 25 requests/day (free tier)

Data Scope: Stock time series, forex, crypto, technical indicators, fundamental data

Key CRE Series: Treasury yield time series, mortgage REIT dividend yields, sector performance

CORS: Yes

9. Walk Score

Registration: <https://www.walkscore.com/professional/api-sign-up.php>

Rate Limit: 5,000 calls/day (free tier)

Data Scope: Walk Score, Transit Score, Bike Score for any US lat/lon

Key CRE Series: Walk Score (0–100), Transit Score, Bike Score — strong rent premium correlators

CORS: No

10. OpenWeather

Registration: <https://openweathermap.org/appid>

Rate Limit: 1,000 calls/day (free tier)

Data Scope: Current weather, 5-day forecast, historical weather, air pollution index

Key CRE Series: Severe weather alerts, historical temperature extremes, air quality by property location

CORS: Yes

11. HUD User

Registration: <https://www.huduser.gov/hudapi/public/register>

Rate Limit: Undisclosed (generous)

Data Scope: Fair Market Rents, income limits, LIHTC, Section 8, housing affordability data

Key CRE Series: FMR by ZIP (Section 8 rent ceiling), income limits for LIHTC underwriting, housing affordability index

CORS: Yes

12. Regulations.gov

Registration: <https://api.data.gov/signup/>

Rate Limit: 1,000 calls/hour

Data Scope: Federal regulatory docket search, proposed rules, public comments

Key CRE Series: HUD, FDIC, OCC, CFPB proposed rules affecting CRE lending and compliance

CORS: Yes

13. CoinGecko Demo API

Registration: <https://www.coingecko.com/en/api/pricing>

Rate Limit: 30 calls/minute

Data Scope: Crypto market data, historical prices, exchange volumes, DeFi protocols

Key CRE Series: BTC/USD, stablecoin market cap, DeFi TVL — alternative capital flow indicators

CORS: Yes

14. Twelve Data

Registration: <https://twelvedata.com/register>

Rate Limit: 800 calls/day (free tier), 8 calls/minute

Data Scope: Real-time and historical stock/forex/crypto, technical indicators, fundamentals

Key CRE Series: REIT ETF tracking, forex pairs (USD/ILS, EUR/USD), yield curve time series

CORS: Yes

TIER 3: PAID — INSTITUTIONAL GRADE

Activated as deal flow justifies the spend. Each source below is a vendor relationship.

1. CoStar

URL: <https://www.costar.com>

Annual Cost: \$25,000–\$50,000 per seat

Data: CRE comps (sales, leases), property details, tenant information, market analytics, vacancy/absorption

CRE Use: Gold-standard CRE comparable database; required for institutional-quality underwriting.

2. MSCI Real Capital Analytics (RCA)

URL: <https://www.msci.com/real-assets>

Annual Cost: \$30,000–\$60,000

Data: Verified \$2.5M+ CRE transaction data, cap rate trends, capital flows by metro/sector

CRE Use: Transaction-level pricing intelligence; cap rate trend analysis; investor tracking.

3. Trepp

URL: <https://www.trepp.com>

Annual Cost: \$20,000–\$45,000

Data: CMBS loan-level data, delinquency, special servicing, CLO analytics

CRE Use: CMBS surveillance; distressed debt screening; maturity wall analysis.

4. Yardi Matrix

URL: <https://www.yardimatrix.com>

Annual Cost: \$15,000–\$35,000

Data: Multifamily rent comps, property-level financials, pipeline tracking

CRE Use: Multifamily underwriting — rent comps, occupancy trends, new supply pipeline.

5. Moody's CRE

URL: <https://cre.moodyanalytics.com>

Annual Cost: \$20,000–\$50,000

Data: Property valuations, forecasted NOI, loss severity models, MSA forecasts

CRE Use: Default probability models; portfolio-level risk analytics; regulatory stress testing.

6. Reonomy

URL: <https://www.reonomy.com>

Annual Cost: \$10,000–\$25,000

Data: Property ownership, debt records, tax assessment, building details, owner contact info

CRE Use: Off-market deal sourcing; owner identification; debt maturity screening.

7. Cherre

URL: <https://www.cherre.com>

Annual Cost: \$25,000–\$75,000

Data: Unified CRE data platform — tax, deed, mortgage, permit, environmental, demographics

CRE Use: Data warehouse integration; property-level enrichment from 30+ underlying sources.

8. Placer.ai

URL: <https://www.placer.ai>

Annual Cost: \$15,000–\$40,000

Data: Foot traffic analytics, visitor demographics, trade area analysis, cross-shopping

CRE Use: Retail/hospitality underwriting — actual foot traffic vs. pro forma assumptions.

9. ATTOM Data

URL: <https://www.attomdata.com>

Annual Cost: \$5,000–\$25,000

Data: Property tax, deed, mortgage, foreclosure, hazard risk, school ratings

CRE Use: Comprehensive property enrichment; foreclosure pipeline monitoring; hazard risk.

10. Precisely (formerly Pitney Bowes)

URL: <https://www.precisely.com>

Annual Cost: \$10,000–\$30,000

Data: Address verification, geocoding, parcel boundaries, property attributes

CRE Use: Address normalization and geocoding backbone; parcel-level geometry.

11. CoreLogic

URL: <https://www.corelogic.com>

Annual Cost: \$15,000–\$40,000

Data: MLS data, property valuations (AVM), mortgage performance, natural hazard risk

CRE Use: Residential comp data for multifamily; AVM validation; flood/fire/wind risk scoring.

12. S&P; Global Market Intelligence

URL: <https://www.spglobal.com/marketintelligence>

Annual Cost: \$25,000–\$60,000

Data: Bank financial data, CRE loan portfolios, credit ratings, economic forecasts

CRE Use: Lender analysis; bank CRE concentration ratios; credit market intelligence.

13. Bloomberg Terminal

URL: <https://www.bloomberg.com/professional/>

Annual Cost: \$25,000 per seat

Data: Real-time financial data, CMBS pricing, yield curves, economic releases, news

CRE Use: Real-time market data backbone (note: Terminal pulls much of the same underlying data for free).

14. Reis (Moody's)

URL: <https://www.reis.com>

Annual Cost: \$15,000–\$35,000

Data: Submarket-level rent, vacancy, absorption forecasts for office, retail, industrial, multifamily

CRE Use: Submarket supply/demand forecasting; rent growth projections for DCF models.

15. Green Street

URL: <https://www.greenstreet.com>

Annual Cost: \$20,000–\$50,000

Data: REIT analytics, CPPI (property price index), sector outlooks, NAV estimates

CRE Use: Public-market CRE pricing signals; REIT vs. private market spread analysis.

16. Lightbox (formerly DMP/EDR)

URL: <https://www.lightboxre.com>

Annual Cost: \$10,000–\$30,000

Data: Environmental risk reports, Phase I database, property tax, demographics, parcel data

CRE Use: Environmental due diligence; Phase I ESA database searches; parcel mapping.

17. Axiometrics (RealPage)

URL: <https://www.realpage.com/analytics/>

Annual Cost: \$12,000–\$30,000

Data: Multifamily market analytics, rent forecasts, pipeline tracking, lease transaction data

CRE Use: Multifamily rent forecasting; competitive set analysis; new supply impact modeling.

18. CompStak

URL: <https://www.compstak.com>

Annual Cost: \$8,000–\$20,000

Data: Lease comps (office, retail, industrial) — crowdsourced from brokers, verified

CRE Use: Lease comparable analysis; effective rent benchmarking; tenant credit analysis.

19. Orbital Insight

URL: <https://www.orbitalinsight.com>

Annual Cost: \$20,000–\$50,000

Data: Satellite imagery analytics — parking lot occupancy, construction progress, land use change

CRE Use: Alternative data for retail traffic, warehouse utilization, development monitoring.

20. Dun & Bradstreet

URL: <https://www.dnb.com>

Annual Cost: \$5,000–\$25,000

Data: Business credit reports, company financials, industry classification, corporate linkage

CRE Use: Tenant credit analysis; business health scoring; corporate family tree for lease guarantor analysis.

Frequently Asked Questions

Q: If the data is free, can it disappear?

A: These are Federal Reserve (operational since 1991), Bureau of Labor Statistics (since 1884), Census Bureau (since 1790), FEMA (National Flood Insurance Act of 1968). They are mandated by federal law. The Federal Reserve Act, the Census Act (Title 13 USC), and the Budget and Accounting Act of 1921 legally require these agencies to publish this data. Their APIs have been stable for 10–30 years. Defunding would require an act of Congress.

Q: Is free data low quality?

A: Bloomberg charges \$25,000/year to display the same NY Fed SOFR rate and BLS employment data that Terminal pulls directly from the source for free. The data is identical — Bloomberg is a display layer. Terminal goes to the source, eliminating the middleman and the cost.

Q: What's the real moat?

A: The data is accessible to anyone who knows where to look. The 4-stage analytical pipeline, 59 underwriting models, adversarial challenge engine, and provenance spine are not. The moat is not the data — it's the intelligence layer that transforms 63 raw feeds into actionable CRE deal recommendations in under 90 seconds. Time to replicate: 12–18 months.

Q: What if paid sources get too expensive?

A: Even at full Tier 3 deployment (\$300K/year), Terminal processes 12,500+ deals/year — that's \$24 per deal analyzed. A single successful CRE acquisition generating even modest returns pays for a decade of data costs. The ROI is asymmetric: data cost is fixed, deal value is unbounded.

Q: How long does full deployment take?

A: Tier 1 (29 sources): zero setup, operational immediately. Tier 2 (14 sources): under 15 minutes of registration. Tier 3 (20 sources): activated incrementally as deal volume justifies each vendor. Terminal is production-ready on Day 1 with 43 free sources.

Q: What happens if an API goes down?

A: Terminal implements graceful degradation. Each data source has a staleness threshold. If SOFR hasn't updated in 24 hours, the system flags it and falls back to the last known good value with a confidence adjustment. No single source failure blocks deal analysis.

Appendix: Tier 2 Registration Checklist

Complete all 14 registrations below to unlock full Tier 2 access. Total time: under 15 minutes.

#	Source	Registration URL	Time	Status
1	FRED API	fred.stlouisfed.org/docs/api/api_key.html	60 sec	■
2	Census Bureau	api.census.gov/data/key_signup.html	60 sec	■
3	BLS v2	data.bls.gov/registrationEngine/	60 sec	■
4	BEA	apps.bea.gov/API/signup/	60 sec	■
5	EIA	www.eia.gov/opendata/register.php	60 sec	■
